

We are looking for: Software Developer (m/f/d)

Do you want to work creatively and independently? Programming is your thing and you want to show what you're up to? We are looking for Java developers who enjoy developing and optimizing complex, innovative software solutions using the latest technologies and would like to prove themselves. You like to face challenges and don't shy away from complex tasks? Then apply now with us!

Who are we looking for?

As a software developer, you take on various tasks in exchange with colleagues and customers, such as:

- Transfer of technical requirements into technical concepts
- Test-driven and service-oriented implementation
- Provide logical services and APIs
- Development and further development in existing frameworks
- Documentation, integration, testing and troubleshooting
- Project

Our customer base includes medium-sized companies up to large international companies. e2 Security offers an ever-growing field of services in IT security consulting and is a trusted partner for internationally operating companies. We offer good development & promotion opportunities.

We are working on the pulse of the times - technological progress is helped by us. That's why we want to quickly and easily translate your ideas into new products and services.

What do you bring with you?

We appreciate a serene working atmosphere, which leaves time for professional and private exchange with colleagues. Mutual support is our priority – we are nerds, but not lone fighters.

Soft Skills:

- Fun working flexibly in projects
- Affinity for current developments in IT technology
- Creative will and creativity in dealing with new topics
- Willingness to travel within Germany and the joy of customer contact
- German and English skills in word and writing
- Teamwork

Hard-Skills:

- Completed studies or comparable training with professional experience
- As much as possible a few years of experience in the field of information security or a related professional field
- Java knowledge (Java/Script, NodeJS, etc.)
- Docker, GIT Hub, JUnit, Spring, Hibernate, Eclipse, SQL, Apache Maven, Jira
- Experience in back-end and front-end development
- HTML, CSS
- Unix, Linux

What do we offer?

The e2 Security has a lean management level that has an open ear for everyone. The appreciation of all employees is particularly important here. Heart and humour are common companions in our daily work.

- Flexible working timeenmodels
- Good pay for your work
- Job tickets and tickets for specialist conferences are taken over by us.
- A team that grows must also grow together. If necessary, we devote ourselves to this daily in employee meetings or scrums. We also host team building events every 6 months.

Location: Rüsselsheim or Cologne!

There is room for your creativity!

Have we aroused your interest? Then apply and send us a short cover letter with CV, earliest possible entry date and your salary presentation.
